PROFESSIONAL SUMMARY

Software Engineer and Full-Stack Developer with 2+ years of experience building production web applications using React.js, Next.js, Node.js, Express.js, MongoDB, Firebase, TypeScript, and Python. Expanded from individual product delivery into Associate Team Lead ownership for an 8-member team, covering sprint execution, code reviews, CI/CD releases, junior mentoring, client communication, and GenAI API integration. Targeting SDE-1/SWE-1 roles where end-to-end product ownership, teamwork, and fast learning are required.

TECHNICAL SKILLS

Programming: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, React Native, Tailwind CSS, ShadCN UI, GSAP

Backend: Node.js, Express.js, REST APIs, API Integration, Authentication, Firebase, Appwrite, Clerk

Databases: MongoDB, PostgreSQL, Firebase Realtime Database

AI / Data: GenAI API Integration, Gemini AI, Python Automation, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch

DevOps / Tools: Git, GitHub, Vercel, CI/CD Pipelines, Agile/Scrum, Jira

Collaboration: Team Leadership, Code Reviews, Pair Debugging, Mentorship, Technical Documentation, Client Communication

WORK EXPERIENCE

Verity & Proinkfluence IT Solutions Pvt. Ltd. | Associate Team Lead / Full-Stack Developer | Jan 2024 - Present

Hybrid, Full-Time | Team of 8 | React.js, Node.js, Python, MongoDB, Firebase, GenAI APIs

- **Led** sprint planning, standups, retrospectives, code reviews, and release coordination for an **8-member engineering team**, improving delivery visibility across **developers, clients, and leadership**.
- Built and deployed **full-stack MERN product features** across **5 delivery layers**: requirements, **Node.js/Express REST APIs**, **React.js** interfaces, MongoDB schemas, and Vercel releases.
- Developed a **Python and GenAI API automation workflow** that replaced **1 repetitive manual process**, returned **weekly execution capacity**, and reduced turnaround time for client deliverables.
- **Coordinated across 3 stakeholder groups - clients, developers, and leadership** - to translate technical blockers, API changes, deployment risks, and sprint progress into **structured updates**.
- **Mentored 3+ junior developers** through code reviews, pair debugging, and architecture walkthroughs; helped **2 teammates** move toward independent feature ownership **within 3 months**.
- Implemented **CI/CD pipelines** using GitHub and Vercel to **standardize deployments**, reduce manual release steps, and create **repeatable production releases** across active projects.
- Integrated **2 real-time services - Firebase Realtime Database and GetStream** - to ship sync, live chat, and activity-feed features in deployed applications.
- Created **3 documentation tracks - API, onboarding, and internal process docs** - so developers could **ramp up faster** and reduce dependency on verbal handoffs.

PROJECTS

Spaceify AI | Solo Full-Stack AI Project | [GitHub](https://github.com) | [Live: spaceify-ai.vercel.app](https://spaceify-ai.vercel.app)

Stack: React Router v7, TypeScript, Tailwind CSS, Puter.js, Gemini AI, Bun, Puter FS, Puter KV, Puter Workers, Puter Auth

- Built a **React Router v7** and **TypeScript** application that converts uploaded **2D floor plans** into photorealistic 3D render-style outputs using **Gemini AI**.
- Designed a **4-stage serverless workflow** for file upload, AI generation, **KV metadata storage**, and **authenticated project access** using Puter.js infrastructure.
- Implemented before/after render previews with **React Compare Slider** and deployed the application using **Puter Hosting and Workers**.

EDUCATION

B.Tech - Artificial Intelligence and Machine Learning | First Class | 2021 - 2024

Institute of Aeronautical Engineering (IARE), Hyderabad

Diploma - Computer Science Engineering | First Class | 2017 - 2020

Jyothismathi Institute of Technology & Science, Karimnagar
